

MULTI-APPLICATOR

YASUI SEIKI

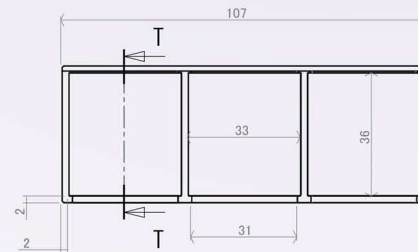

Precision Coating Specialists

The Multi-Applicator is designed to simultaneously test multiple coating thicknesses. The standard specification comes with three compartments to test three thicknesses (M3), and can also be made reversible to test six thicknesses (M6). The compartment size and numbers can be customizable to fit the customer's needs. Its high precision, wire cut, single-piece structure makes it easy to use and clean. Use to coat by hand or on a test coater such as the Mini-Labo™ or βCoater™.

Specifications

- W40 x D33 x H20 mm
- Stainless steel
- Gaps:
 - For low viscosity fluids: 20, 40, 60 μm
 - For medium viscosity fluids: 75, 100, 125 μm
 - For high viscosity fluids: 100, 200, 500 μm
 - Custom gaps possible as low as 10 μm

Multi-Applicator M6
